

## PRODUCT DATA SHEET

### **“No. 80”**

Jenny Coil Conditioner

#### **Product Description:**

Number 80 is an inhibited chemical for de-liming coils. Removes minerals and other coil clogging deposits with minimum effect of metal surfaces. Thoroughly removes coil deposits caused by hard water, improper operations of cleaning or improper use of cleaning compounds.

#### **Instructions for use:**

For cleaners with 120 GPH (2 GPM) approximately 1 gallon of coil conditioner will be required. Neutralization of acid solution will be required following de-liming procedure. Contact Chaffee-Ward Corporation for specific instructions on procedures for de-liming a specific unit.

#### **Caution:**

Keep out of reach of children

For industrial use only

Refer to MSDS for handling procedures and precautions

Do not breath vapors

Always add acid to water, never water to acid

#### **Technical Data:**

Appearance ... faint yellow liquid

Ph Concentrate ... 1.5

Specific Gravity ... 1.16

Completely soluble in water

Odor ... pungent acidic odor

#### **Distributed by:**
