

PRODUCT DATA SHEET

“Tornado”

Product Description:

Tornado is a very aggressive, caustic cleaner, for use on heavy construction equipment, milling and mining machinery. Cleans tough baked on grease, carbonized and baked on food residues. Cleans vents and hoods in restaurants. Tornado is designed for use on concrete walls and floors.

Instructions for use:

Use Tornado at dilution rates 100:1 to 10:1 on surfaces to be cleaned. It can be used through chemical injectors with dilution ratio 100:1 at wash nozzle. Pre-soaking can be done with a minimum of 10:1. Rinse surfaces thoroughly with liberal amounts of water. The product contains strong caustic alkali and should NOT be used on polished surfaces such as aluminum, magnesium or other soft metals.

Caution:

Keep out of reach of children

For industrial use only

Use eye and hand protection

Refer to MSDS for handling procedures and precautions

Airborne concentrations of mist, vapor or spray can irritate throat and respiratory system

Technical Data:

Appearance ... red liquid

Ph Concentrate ... 13.9

Specific Gravity ... 1.06

Completely soluble in water
